Flat Disperse Fog Ring Installation Instructions
for the Style 3293 30-125 gpm
FireFox™ Nozzles

DISASSEMBLY 30-125 GPM NOZZLE
1. Remove the two socket head cap screws that hold the turbine teeth retaining ring.
2. Remove the turbine teeth retaining ring and turbine teeth.

REASSEMBLE 30-125 GPM NOZZLE
1. Install the flat disperse fog ring using the same socket head cap screws removed in disassembly.
   Note: Use Loctite 222 or Permabond 113 on screw threads.
2. Test nozzle for full movement and desired flow.
