Flat Disperse Fog Ring Installation Instructions
for the Style 3293 125-350 & 350-500 gpm
FireFox™ Nozzles

DISASSEMBLY 125-350 & 350-500 GPM NOZZLES

1. Remove the two socket head cap screws that hold the turbine teeth retaining ring.

2. Remove the turbine teeth retaining ring, o-ring and turbine teeth.

REASSEMBLE 125-350 & 350-500 GPM NOZZLES

1. Install the flat disperse fog ring with o-ring using the same socket head cap screws removed in disassembly.

Note: Use Loctite 222 or Permabond 113 on screw threads.

2. Test nozzle for full movement and desired flow.
