33560009 In Cab Manual Override Kit
Installation Guide

Caution:
The maximum Rotation (Left / Right), when using these manual cables will be 180 degrees (+/- 90 deg. as shown in drawing).
Mechanical Hard Stops for Rotation on the 3356 Trident Roof Turret must be set so that the maximum travel cannot be exceeded. This limitation is because the override cables should be bent only so far. Refer to the Instruction Manual for the 3356 Trident Roof Turret for hard stop setting information.

Setup Instructions:
1 - Prepare mounting holes for installation of cables into cab roof.
   Two through holes required: 0.781” diameter each.

Figure 1

Maximum Rotation with Manual Override Cables: 180 deg.
(+ - 90 deg from Position Shown)
2 - Remove the two Manual Override hand wheels from the 3356 Trident roof Turret by first removing the center plastic cover, then removing the screw and washer that hold each Manual Override hand wheel in place.
3 - Remove the two set screws that hold the manual override mechanism in place on the 3356 Trident Roof Turret, then remove shaft and collar assembly. NOTE: Spring stays inside override housing.

4 - Install drive end (hex end) of override cable fully into the manual override housing.

5 - Tighten set screws.
6 - Install sealing washer onto threaded end of override cable before inserting threaded end of cable into cab roof.

7 - Install internal star lock washer and threaded “stand-off” nut.

8 - Install escutcheon plate (Fig. 3) over stand-off nuts. (Mounting hardware supplied by installer)

9 - Install manual override hand wheel on shaft end (careful not to lose the key on drive shaft), then reinstall washer, screw, and plastic cover. Use “Small Screw” type thread locker on threads of screw.
Operating Instructions:
Make sure that power is off to the 3356 Roof Turret, or that it will not be operated electrically. Push manual override handle in to engage, then turn. The manual override mechanism is spring loaded, so it will automatically disengage as soon as the manual override hand wheel is released.
