(3) 1/4" DIA FASTENER REQ
INSTALLATION INSTRUCTIONS:
1. Position the mounting bracket in its desired location, and determine if it will fit within the desired clearance.
   (Refer to figures 1 and 2.)
2. Once positioned, use the mounting bracket as a template to mark the three mounting holes on the vertical surface.
3. Remove the mounting bracket and drill three 1/4" holes where marked.
4. Position the mounting bracket over the drilled holes, and with the lock pin lanyard mounted over the outer two holes (Fig 2). Install three 1/4" diameter bolts of sufficient length with lock washers and nuts. Tighten the three bolts securely.

MOUNTING INSTRUCTIONS:
1. Hold the ground base with the swivel inlet down and the legs folded in the storage position.
2. With the folded legs facing away from the mounting bracket, slide the ears of the ground base that connect with the liftoff onto the mounting bracket.
3. While holding the ground base on the mounting bracket, install the two mounting bracket locking pins from the top through the holes in the ground base ears.
4. Check the ground base to ensure secure attachment.
