**IMPORTANT**

The Style 3951 95 GPM foam nozzle with pickup tube is set at 6% pickup rate. This percentage can easily be changed to 1/2%, 1%, or 3% with the addition of a metering washer.

To change the percentage of pickup:
1. Remove the gasket from the induction chamber.
2. Select the proper metering washer.
3. Place the metering washer in the induction chamber.
4. Replace the gasket.

To identify the proper orifice:
- To 1/2%: .100
- To 1%: .132
- To 3%: .221

To operate at 6% a metering washer is not required

To order additional spaces:
- 1/2% Part Number 104710
- 1% Part Number 104711
- 3% Part Number 104709
