INSTALLATION INSTRUCTIONS

This flow kit is designed to allow you to convert your Assault nozzle to a different flow rate. The conversion instructions must be followed in order to assure the Assault achieves the flow indicated on the baffle.

IMPORTANT - Each nozzle has a color coded metal flow spacer under the baffle head, and may have a plastic adjustment shim. The plastic adjustment shim must be used with the conversion baffle. NOTE: The 13 GPM and 50 LPM do not use a flow spacer, only a plastic adjustment shims are required.

INSTRUCTIONS

1. Remove the screw that secures the baffle head. Caution: Be careful not to lose flow spacer and adjustment shim.
2. Remove the baffle head, flow spacer and adjustment shim.
3. Remove the plastic thread cap from the new baffle screw.
4. Take the plastic adjustment shim from the original baffle assembly and place it between the new baffle head and the new flow spacer.
5. Install the new baffle assembly onto your Assault nozzle. Be sure the screw is securely hand tightened.
6. Flow test the nozzle to be sure it is operating properly.
