

Aero-Maxx® II

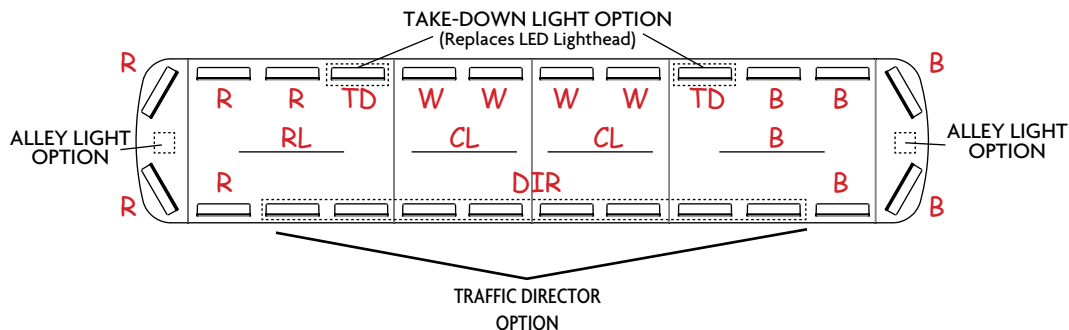

NFPA Lightbar Configuration Guide 9188-1500 Series

Step 1. Indicate the lighthouse type/color and location directly on the lightbar map for the appropriate size you wish to configure. Use the Legend to indicate the lighthouse type/color.

Step 2. Indicate the dome color on the blank line provided on the lightbar map. (The end domes will be the same color as its adjacent dome.)

Step 3. Fax or e-mail the completed form to 614.527.3547 or wtisales@weldoninc.com

Configuration Rules:

- For NFPA compliance, a minimum of 4 red or blue and 2 white forward facing lighthoods and 2 red or blue side facing on each side are required. There shall be no amber forward facing or white rear facing lighthoods.
- There shall be no more than 20 lighthoods on any lightbar. This does not include take-down lights, alley lights or traffic director.
- Take-Down lights are installed in pairs. The take-down light locations are indicated by the dashed lines in the front of the lightbar. The take-down lights replace two LED warning lighthoods.
- Alley lights are installed as a pair. The dashed lines at the end of each lightbar indicate the alley light location.
- The traffic director utilizes 7 lighthoods on the 54" lightbar and 8 lighthoods on the 59" and 72" lightbars. The dashed lines at the rear of the lightbar indicate the traffic director location.
- The traffic director is not available on lightbars shorter than 54".
