YOUR VEHICLE IS TALKING. ARE YOU LISTENING?
**Link 2 is listening!** By capturing critical vehicle data and reporting it to a secure web-based dashboard, you now have valuable insight into your vehicle’s performance. Access your data anytime so you can be confident your vehicle is ready for the next run.

The Link 2 module connects directly to your vehicle’s J1939 port and records vehicle data received from the CAN bus network. Information is captured and transmitted automatically to the Link 2 servers and viewed through the online dashboard. Receive alerts on your mobile device when your vehicle needs attention. Link 2 is compatible with all heavy duty trucks manufactured after 2001.
Servers

Link2 vehicle data is uploaded wirelessly and stored on secure, redundant servers.

Know Your Vehicles are Always Ready for the Next Run

Link2 offers visibility to critical engine, fuel level, tank level, and diagnostic data. The data is automatically captured and reported via a standard Wi-Fi connection to an easy-to-use web dashboard. Link2 helps maintenance personnel quickly and easily resolve issues to keep your fleet up and running.

Convenient, Anytime Access to Your Vehicle Data

Collected vehicle data is presented on an intuitive, user-configurable dashboard for easy access anywhere in the world. Parameters can be configured for each monitored item. An e-mail alert is triggered by out-of-range parameters, letting you know exactly when your vehicle needs attention. Link2 takes the guessing game out of cryptic engine codes so you can make informed decisions quickly.

Improve Driver Safety and Performance

Use run data to enhance driver training and increase public safety. Information collected can be dissected to use as a training tool. Review runs step-by-step to help your team be more efficient while improving safety.

Reduce Maintenance and Repair Costs

Link2 can help you avoid costly unplanned maintenance and downtime. With easy access to vehicle data and email alerts, you can stay in touch with your vehicle at all times. Look and listen for early warning signs. Track daily usage to help you schedule preventative maintenance before problems develop.

View vehicle data through the Link2 Dashboard. Understand and analyze your vehicle by utilizing the following tools:

- Alerts
- Maintenance
- Inspections
- Activity Logs and Graphs
