

PWM Converter Module

STYLE 0N80-2485-00

This module eliminates the visible flicker that is sometimes associates with PWM dimming of dome lamps. Converts instable PWM lamp signal to a very stable and visually pleasant lamp control.

Features

Module has two output channels which can independently supply up to 10A. Maximum total current through the module is limited to 15A due to the connector rating.

Specifications

Style	0N80-2485-00
Country of Manufacture	
Width	4 in (102 mm)
Height	2 in (50 mm)
Depth	2.0 in (50 mm)
Carton Quantity	1
Volts	12.8
Amperage	15 max
