

Apollo PE AC battery charger

STYLE 6045

The Apollo PE battery charger kit provides the ability to charge the Apollo PE or a spare battery from AC line current. The charger has an input range of 100-240Vac so it can be used in all parts of the world. The kit includes the power supply, North American AC line cord (IEC 60321-1 type C13), and 2.5mm to Deutsch DTP style adapter for connection to the Apollo PE battery pack.

Features

The style 60450005 Apollo PE battery charger:

- Universal 100-240Vac operation
- 12Vdc @ 3.4A output
- Charges Apollo PE or spare battery pack
