

## Switch Interface Transmitter (SIT) module

### STYLE 3600

The Style 3600 switch interface transmitter (SIT) wireless module can be used with the 3600 Wireless remote receiver. It is also compatible with the 6037 CAN wireless receiver of the Universal II product family and some onboard monitor controls. OEM's can use their standard hardware switches with the SIT module to convert those signals to wireless commands to an Akron Brass electric monitor

### Features

2.4 Ghz range standard, 900Mhz range optional

### Specifications

Style	3600
Type	Monitor
